

Wheel Balancer

BTD900B Price 986eur.

- ▲ Static, AL1, AL2, AL3 balancing modes
- ▲ High-precision mechanical spindle is imported bearing, which ensures the measuring precision
- ▲ Changeable between gram and ounce ; Changeable between millimeter and inch.
- ▲ Self diagnosis and self calibration.
- ▲ Large cone and flange for light truck, minibus and Iveco are optional.
- ▲ Equipped with installment head which can stick clips easily and accurately

BTD 900A Price 1152eur.

- ▲ The same as functions of BTD900B
- ▲ Optional adapters with center studs for balancing tires, such as Picasso, Elysee
- ▲ Perfect wheel guard with the function of starting automatically
- ▲ Equipped with foot braking pedal to stabilize tires and choose more accurate balance position.
- ▲ Large cone and flange for light truck, minibus and Iveco are optional.

BTD 950 Price 1282eur.

- ▲ The same as functions of BTD900B
- ▲ Optional adapters with center studs for balancing tires, such as Picasso, Elysee
- ▲ Perfect wheel guard with the function of starting automatically
- ▲ Equipped with foot braking pedal to stabilize tires and choose more accurate balance position.
- ▲ American potentiometer of automatic measuring gauge can measure wheel distance accurately.
- ▲ Large cone and flange for light truck, minibus and Iveco are optional.

BTD 1900A Price 2236eur.

- ▲ Automatic measuring gauge is imported American locator , measuring data of wheel distance accurately.

BTD 1900M Price 2500eur.

- ▲ Hi-precision mechanical spindle is imported bearing, which ensures the measuring precision
- ▲ Perfect wheel guard with the function of starting automatically.
- ▲ Changeable between gram and ounce ; Changeable between millimeter and inch.
- ▲ Design for twice braking makes operation more accurately and conveniently.
- ▲ Self diagnosis and self calibration.
- ▲ Equipped with foot braking pedal to stabilize tires and choose more accurate balance point.

BTD 1299 Price 2690eur.

- ▲ 3D display screen
- ▲ Split clip-weight Mode: Clips at the back of tire can protect outside of rim from damage
- ▲ American potentiometer of automatic measuring gauge can measure wheel distance accurately.
- ▲ Other functions are same with XTB1900A

- ▲ For various types of tires, both larger size and smaller size
- ▲ Equipped with Integrated Wheel Lift System which can lift large size tire easily
- ▲ Powerful spindle and imported bearings ensure measuring accuracy
- ▲ Static, AL1, AL2, AL3 balancing modes.
- ▲ Perfect wheel guard with the function of starting automatically.
- ▲ Changeable between gram and ounce ; Changeable between millimeter and inch.
- ▲ Equipped with foot braking pedal to stabilize tires and choose more accurate balance point.
- ▲ Split clip-weight Mode: Clips at the back of tire can protect outside of rim from damage
- ▲ Equipped with clip installment head which can stick clips easily and accurately
- ▲ Smaller cabinet and smaller package save much room
